LUNGEKRÆFT	32
ÆGGESTOKKRÆFT	41

LEDSAGEBEMÆRKNINGER

Dette bilag indeholder de detaljerede deskriptive analyser af absolut overlevelse for hver kræftform. Absolut overlevelse anses for den mest hensigtsmæssige og centrale størrelse til sammenfatning af overlevelsesh- og dødelighedsforhold i klinisk kontekst.

Mortalitetsrater og relativ overlevelse indgår i oversigtsanalyserne i hovedrapporten, hvortil der henvises.

Absolut overlevelse er beregnet som Kaplan-Meier estimater med tilhørende 95% sikkerhedsintervaller.

Ved standardisering af den absolutte overlevelse anvendes den ældste af de internationale vedtagne cancerpopulationer¹

Resultaterne er opgjort overordnet i forhold til kohorte på diagnosetidspunkt efter følgende inddeling:

- Totalt
- 2000-2002
- 2003-2005
- 2006-2008
- 2009-2011
- 2012-2014

Der er foretaget stratificeret analyse som sammenfattet i bilagstabel.

Inden for hver kræftform fremlægges absolut overlevelse efter denne skabelon

Table 1.0. 1-year absolute survival for breast cancer.

Table 1.1. 1-year absolute survival for breast cancer conditional on 1 year survival.

Table 1.2. 1-year absolute survival for breast cancer conditional on 2 years survival.

Table 1.3. 1-year absolute survival for breast cancer conditional on 3 years survival.

Table 1.4. 1-year absolute survival for breast cancer conditional on 4 years survival.

Table 2.0. 5-year absolute survival for breast cancer.

Table 3.0. 1-year standardized absolute survival for breast cancer.

Table 4.0. 5-year standardized absolute survival for breast cancer.
